

Habitat Restoration Project 2008

- Cobourg Brook: Cobourg, Ontario -

Holmes Riparian Tree Planting

Habitat Project Lead: *Ontario Federation of Anglers and Hunters (OFAH)*

Habitat Project Funding Lead: *OWF*

Date Completed: *October 23rd, 2008*

The Holmes Riparian Tree planting took place in the fall of 2008 to stabilize stream banks along the Cobourg Brook. The Holmes property has been a site of previous restoration projects including a logjam removal in 2006 and other riparian plantings in 2008. This riparian planting was at a site where the bank was unstable and subsequent work was carried out including LUNKER installation and boulder placement within the stream. The OFAH staff had the assistance from a class of high school students to complete the riparian planting (figure 1). In total the class and teachers planted 400 trees and shrubs along the stream bank (figure 2).
